Rejuvaslim

The theory is that over time, toxins get stored in fat cells and stick to the walls of our digestive system. This is known as 'intestinal plaque', and with rejuvaslim it gets broken down and expelled.

What happens? A scanner's used to identify problem spots, then electronic pads are attached to your body. Tiny electrical impulses stimulate the lymph system to eliminate toxins and break down your intestinal plaque. You'll have ten painless one-hour treatments. Follow the eating plan (calories aren't controlled, but the diet's fruit and veg-based and uses organic produce) and four sessions could see you losing a stone.

Good for... Weight loss, cellulite removal, PMT, general fatigue and skin disorders such as eczema.

Go try it! To find your nearest Rejuvaslim salon call 020-8662 0780. Each treatment will cost around £45. **NW**
